Education

Lakehead University, Thunder Bay | MS in Computer Science - GPA: 4.0/4.0

2023 – 2024

Courses: Web Development, NLP, Mobile Programming, Pattern Recognition

Thunder Bay, Ontario

Sastra Deemed to be University | B.Tech Computer Science - CGPA: 8.48

2019 - 2023

Courses: Full-Stack Web Development, Java, Data Structures & Algorithms, Software Engineering

Thanjavur, Tamil Nadu

Experience

Trinal Web Pvt. Ltd. | Developer - MERN Stack

August 2022 - January 2023

- Key contributor at Trinal Web Pvt. Ltd., a Web 3.0 startup, leading the redesign and development of the company's website using **Next.js**, enhancing site performance and boosting user engagement by 20%.
- Led a team of 5 developers**, ensuring optimized front-end architecture, and efficient component-based development. Implemented **RESTful APIs** to enhance data flow between the frontend and backend, reducing load time and improving overall performance.
- Developed and integrated backend services using **Node.js**, **Express.js**, and **MongoDB**, ensuring secure API endpoints, authentication (**JWT**), and database management.
- Optimized database queries and implemented data caching techniques using **Redis** to improve response times.

Accenture | Advanced App Engineering Analyst Intern

June 2022 - August 2022

- Contributed to the **AI-RISE Remote Sensing** project, developing **Python-based automation scripts** that eliminated manual data collection, enabling the extraction of 48,000+ data points in a single run and significantly accelerating project delivery.
- Utilized **Google Earth Engine (GEE)** to process satellite imagery and implemented **AWS Lambda** functions to automate data ingestion into **Amazon S3**, ensuring scalable and efficient cloud storage.
- Designed and implemented AWS-based data processing pipelines using **AWS Glue** and **AWS QuickSight** for real-time querying and visualization of processed geospatial datasets.

Smoose | Web Developer

August 2021 - January 2022

- Developed and optimized user-friendly web interfaces using **React.js**, improving UI/UX and increasing customer engagement by 15%. Refactored the existing CSS codebase to **Tailwind CSS**, enhancing styling consistency, performance, and maintainability.
- Integrated **Framer Motion** for animations, resulting in a 30% performance boost while reducing website overhead. Managed website hosting and deployment using **Netlify**.
- Optimized **Server-Side Rendering (SSR)** and **Static Site Generation (SSG)** for better performance and SEO. Collaborated with cross-functional teams to improve front-end architecture, ensuring better scalability and code reusability.

Projects

Wealthsimple | Banking and Finance Management Website

- Designed and developed a full-stack, responsive online banking platform using Next.js, incorporating SSR for enhanced authentication security and performance. Integrated **Plaid and Dwolla APIs**, enabling users to securely connect and manage multiple accounts.
- Implemented group routes and server actions, improving API efficiency by 20% and enhancing data-fetching performance. Utilized **React Hook Form and Zod** for robust form validation and state management, ensuring a seamless user experience.
- Integrated **Sentry** for real-time error tracking, reducing issue resolution time by 50% and deployed the platform using **Vercel**.

Vitaly | Blood Donation App

- Collaborated with a team of 5 using **GitHub**, focusing on high-performance UI enhancements to improve user engagement and responsiveness. Developed efficient data models in **Kotlin** for reducing database overhead.
- Designed and implemented **Firestore databases and collections**, optimizing data structure and retrieval efficiency by 25% and configured **Firebase Cloud Storage** for seamless image handling and real-time updates, enhancing app performance.
- Integrated real-time database sync and **offline data persistence**, ensuring a smooth user experience even with limited connectivity.

Notezy | Chrome Extension

- Developed a modern, user-friendly **Chrome extension** for efficient note-taking and organization, enabling users to perform **CRUD operations and categorize notes into pages**. Added **export-to-PDF** functionality, enhancing data portability.
- Implemented **local storage and session storage** strategies to optimize data persistence and offline accessibility. Utilized Chrome Extension APIs for background script management, content scripting, and storage event listeners, ensuring real-time updates.

Skills & Achievements

Languages: TypeScript, JavaScript, Python, Java, C++, SQL, Kotlin, R.

Web Technologies: React.js, Next.js, Redux, Tailwind CSS, HTML5, CSS3, Framer Motion, Node.js, Express.js, Server Actions.

Databases & Cloud: MongoDB, Firebase, PostgreSQL, MySQL, AWS (S3, EC2, RDS, Athena, Glue, DynamoDB)

Developer Tools: Git, GitHub, VS Code, IntelliJ, Eclipse, Jenkins, JIRA.

Google DevFest Hackathon - Second Runner-Up, Lakehead University.

Soft skills: Leadership, Communication, Problem Solving, Teamwork, Presentation.
