Education

Lakehead University, Thunder Bay | MS in Computer Science - GPA: 4.0/4.0

2023 – 2024

Courses: Web Development, NLP, Mobile Programming, Pattern Recognition

Thunder Bay, Ontario

Sastra Deemed to be University | B.Tech Computer Science - CGPA: 8.48

2019 - 2023

Courses: Full-Stack Web Development, Java, Data Structures & Algorithms, Software Engineering

Thanjavur, Tamil Nadu

Professional Experience

Accenture | Full-Stack Developer (Cloud + Geospatial Apps)

January 2023 – June 2023

- Gathered large-scale satellite imagery and geospatial data using **Google Earth Engine (GEE)** and automated ingestion into cloud storage using **AWS Lambda** and **Amazon S3**.
- Built scalable backend services with **Node.js** and **Express**, exposing RESTful APIs to manage and serve geospatial datasets processed through **AWS Glue** pipelines.
- Developed a modern web interface using the **MERN stack (MongoDB, Express, React, Node.js)** to visualize geospatial insights in real time, integrating backend APIs for a seamless user experience.

Trinal Web Pvt. Ltd. | Full-stack Developer - MERN Stack

August 2022 - January 2023

- Key contributor at Trinal Web Pvt. Ltd., a Web 3.0, leading the redesign and development of the company's website using **Next.js**, enhancing site performance and boosting user engagement by 20%.
- Led a team of 5 developers, ensuring a refined front-end architecture, and efficient component-based development. Implemented **RESTful APIs** to enhance data flow between the frontend and backend, reducing load time and improving overall performance.
- Developed and integrated backend services using **Node.js**, **Express.js**, and **MongoDB**, ensuring secure API endpoints, authentication (**JWT**), and database management.
- Improved database queries and executed data caching techniques using **Redis** to improve response times.

Smoose | Front-end Developer

August 2021 - January 2022

- Designed and established user-friendly web interfaces using **React.js**, improving UI/UX and increasing customer engagement by 15%. Refactored the existing CSS codebase to **Tailwind CSS**, enhancing styling consistency, performance, and maintainability.
- Integrated **Framer Motion** for animations, resulting in a 30% performance boost while reducing website overhead. Managed website hosting and deployment using **Netlify**.
- Optimized **Server-Side Rendering (SSR)** and **Static Site Generation (SSG)** for better performance and SEO. Collaborated with cross-functional teams to improve front-end architecture, ensuring better scalability and code reusability.

Technical Projects

WIST | AI Enhanced Goal Planning System with Context-Aware Suggestions and Media-Rich Tracking

- Engineered a full-stack application using **Next.js 14**, **Firebase Auth**, **Firestore**, and **Storage**, enabling authenticated users to plan and manage personal goals with structured metadata and reflections.
- Integrated a **GenAI-powered planning assistant** using **Azure OpenAI** to generate contextual goal plans from title, category, or custom prompts supporting follow-up questions, daily usage tracking, and real-time UI updates.
- Integrated **Tiptap Editor** for rich text planning, custom image memory grids with per-image comments, and **drag-and-drop reordering** via **dnd-kit**, all enhanced by smooth animations using **Framer Motion**.
- Designed a fully responsive interface using **Tailwind CSS** and **ShadCN**, with support for dark/light mode and intuitive UX

Vaultic | Cloud Storage and File Sharing Platform

- Developed a **full-stack file storage** and file sharing platform using **Next.js 15**, **React 19**, and **TypeScript**, enabling users to upload, manage, and share files securely. Integrated **Appwrite** for backend storage, authentication, and database operations.
- Implemented **OTP-based authentication** using Appwrite Authentication, ensuring secure user sign-ins. Designed a real-time dashboard with **React Server Actions**, providing insights into storage usage, recent uploads, and file categorization.
- Optimized **file management operations** with **Appwrite Cloud Functions**, enabling real-time updates, global search, and sorting features. Deployed on **Vercel** with **CI/CD pipelines** for automated build and deployment.

Wealthsimple | Banking and Finance Management Website

- Designed and built a full-stack, responsive online banking platform using Next.js, incorporating SSR for enhanced authentication security and performance. Integrated **Plaid** and **Dwolla APIs**, enabling users to securely connect and manage multiple accounts.
- Implemented group routes and server actions, improving API efficiency by 20% and enhancing data-fetching performance. Harnessed **React Hook Form** and **Zod** for robust form validation and state management, ensuring a seamless user experience.
- Integrated **Sentry** for real-time error tracking, reducing issue resolution time by 50% and deployed the platform using **Vercel**.

Skills & Achievements

Languages: TypeScript, JavaScript, Python, Java, C++, SQL, Kotlin, R.

Web Technologies: React.js, Next.js, Redux, Tailwind CSS, HTML5, CSS3, Framer Motion, Node.js, Express.js, Server Actions.

Databases & Cloud: MongoDB, Firebase, Appwrite, PostgreSQL, MySQL, AWS (S3, EC2, RDS, Athena, Glue, DynamoDB), Azure (OpenAI, Cognitive Search, App Service, Container Registry)

Developer Tools: Git, GitHub, VS Code, IntelliJ, Eclipse, Jenkins, JIRA.

Google DevFest Hackathon - Second Runner-Up, Lakehead University.

Soft skills: Leadership, Communication, Problem Solving, Teamwork, Presentation.
